

Dipankar Chowdhury

Full Stack Developer

West Bengal, India | +91-7478524191 | chowdhurydipankar1106@gmail.com | <https://www.linkedin.com/in/dipankar-chowdhury/> | <https://github.com/incodi404>

Summary

Backend-focused Full Stack Developer specializing in Golang, Node.js, PostgreSQL, Elasticsearch, Docker. Experienced in building scalable backend services, REST APIs, event-driven systems, and Linux endpoint monitoring using eBPF.

Technical Skills

- **Programming Language:** Golang, JavaScript, TypeScript
- **Backend:** Gin, Express.js, Node.js, RabbitMQ, NATS JetStream, gRPC, WebSockets, WebRTC
- **Frontend & Data Visualization:** React.js, Next.js, React Native, Kibana, Chart.js
- **Database:** PostgreSQL, MongoDB, Redis, Elasticsearch
- **DevOps:** Docker, Linux, VPS, GitHub Actions, CI/CD Pipeline, PM2, Monorepo

Education

Master's in Computer Science | University of North Bengal | 2024 – Expected 2026

Relevant Coursework: Parallel Computing, Cryptography, JavaScript, Machine Learning.

Bachelor's in Computer Science | Siliguri College | 2021 – 2024

CGPA: 8.2/10.

Experience

Freelance Software Developer | [Live Link](#)

1st Sept 2026 - 15th Sept 2026

Client Project - AI-Powered Travel Web Application

- Integrated an **LLM-based comparison engine** to analyze travel packages across 4 platforms with caching to reduce LLM API calls by ~40%.
- Provisioned and deployed a production VPS with **Nginx reverse proxy, PM2 process management, and MongoDB configuration**.
- Implemented **GitHub Actions CI/CD pipelines** for automated frontend and backend deployments using secure SSH key authentication.

Freelance Software Developer

March 2026 – June 2026

Client Project - Cross-Platform VoIP Calling Application

- Developed a cross-platform VoIP calling application using **React Native and WebRTC** with bidirectional audio communication between 2 devices.
- Implemented real-time communication using Socket.IO and integrated FCM with Notifee, reducing call setup time to under 2 seconds.
- Built backend services and REST APIs with Node.js and Express.js, enabling user authentication, session management, and call coordination with 50+ REST APIs.
- Configured **STUN/TURN server** on Ubuntu 22.04 Linux VPS for production-ready VoIP calling system.

Projects

Logintel: Agent-based Linux Security Log Collecting and Processing System | [Server Github](#) | [Agent Github](#)

- Architected a **microservice-based distributed log collecting and processing system** using Golang.
- Scaled a high-throughput log pipeline ingesting **10K+ logs/minute** via **gRPC Client Streaming**.
- Integrated **Elasticsearch** for log indexing, search, and lifecycle management (ILM) across 7 data streams.
- Containerized **6+ services with Docker** for portable deployment and service isolation.
- Implemented **5 eBPF** hooks for Linux kernel tracing and real-time event monitoring.
- Tech Stack: Golang 1.25, Elasticsearch, PostgreSQL, NATS Jetstream, RabbitMQ, Kibana, Docker, Gin-Gonic, gRPC
