

Dipankar Chowdhury

Backend Engineer (Go)

West Bengal, India | +91-7478524191 | chowdhurydipankar1106@gmail.com |
<https://www.linkedin.com/in/dipankar-chowdhury/> | <https://github.com/incodi404>

Summary

Backend Engineer specializing in **Golang, distributed systems, Linux, gRPC, PostgreSQL, and Elasticsearch**. Experienced in building **high-throughput services, eBPF-based monitoring, and event-driven systems**.

Technical Skills

- **Programming Language:** Golang, JavaScript, TypeScript
- **Backend:** Gin, Node.js, RabbitMQ, gRPC, WebRTC
- **Database:** PostgreSQL, MongoDB, Redis, Elasticsearch
- **DevOps:** Docker, Linux VPS, GitHub Actions, CI/CD Pipeline, PM2, Monorepo
- **Frontend & Data Visualization:** React.js, Next.js, React Native, Kibana, Chart.js

Experience

Freelance Software Developer | [Live Link](#)

Client Project - AI-Powered Travel Web Application

1st Sept 2026 - 15th Sept 2026

- Integrated an **LLM-based comparison engine** to analyze travel packages across 4 platforms with caching to reduce LLM API calls by ~40%.
- Provisioned and deployed a production VPS with **Nginx reverse proxy, PM2 process management, and MongoDB configuration**.
- Implemented **GitHub Actions CI/CD pipelines** for automated frontend and backend deployments using secure SSH key authentication.

Projects

Logintel: Linux Security Log Collection and Processing System | [Server Github](#)

- Architected a **microservice-based distributed log collecting and processing system** using **Golang**.
- Scaled a high-throughput log pipeline ingesting **1K+ logs/sec** via **gRPC Client Streaming**.
- Integrated **Elasticsearch** for log indexing, search, and lifecycle management (ILM) across 7 data streams.
- Containerized **6+ services with Docker** for portable deployment and service isolation.
- Implemented **goroutines and buffered channels** to concurrently ingest logs and persist them to Elasticsearch.
- Tech Stack: Golang 1.25, Elasticsearch, NATS Jetstream, Kibana, Docker, Gin-Gonic, gRPC

Logintel: Linux Endpoint Security Agent | [Agent Github](#)

- Implemented **5 eBPF** hooks for Linux kernel tracing and real-time event monitoring with cilium/ebpf in Go.
- Integrated **fanotify** to capture all file operation events and **D-Bus IPC system** to capture systemd application state.
- Engineered **gRPC client-streaming** pipelines to stream 7 distinct log types to the central server.
- Tech Stack: Golang 1.25, cilium/ebpf, fanotify, DBus, gRPC, Kibana, Docker, Gin-Gonic, gRPC

Gowrite: Golang-based Proxy Server | [Github](#)

- Developed Golang-based Proxy server that can intercept HTTP/HTTPS requests and show the request details.
- Implemented **HTTP CONNECT proxying** to inspect HTTPS connection metadata.

Education

Master's in Computer Science | University of North Bengal | 2024 – Expected 2026

Relevant Coursework: Parallel Computing, Cryptography, JavaScript, Machine Learning.

Bachelor's in Computer Science | Siliguri College | 2021 – 2024

CGPA: 8.2/10.
